

Serial No. 09/542,243 Page 3

termination outside the building, a connector coupled to the second termination, a drywall layer, and a radome that encloses the first termination. The *McDonald* reference illustrates phone wires positioned within a wall that carry reception from a satellite. The *Mast* reference illustrates a two-dimensional phased array antenna architecture. No radome, however, is provided in the *Mast* reference. Both the *Oliver* reference and the *McDonald* reference fail to teach or suggest a radome. The *Mast* reference also fails to teach or suggest a radome. Therefore, applicant respectfully requests the Examiner for reconsideration of claim 21.

Claims 18, 19 and 20 ultimately depend on amended claim 21. Claims 18, 19 and 20 contain further limitations of claim 21 and are allowable for the same reasons set forth above. Namely, the *Oliver* reference does not teach or suggest a radome.

Claims 26 and 28 stand rejected under 35 USC §103(a) as being unpatentable over *Oliver* in view of *Mast* and *Spano* (6,204,823) and *Iwamura* (5,940,028). The *Spano* reference teaches a low profile antenna positioner for adjusting elevation and azimuth. No teaching or suggestion is found in this reference for providing a termination within a radome. *Iwamura* provides a system and method for aligning an antenna. Neither of these two references provides a teaching or suggestion for a termination of a satellite wire within a radome. Therefore, applicant respectfully requests the Examiner for reconsideration of this rejection as well.

Serial No. 09/542,243 Page 4

In light of the above amendments and remarks, applicant submits that the rejections are now overcome. Applicant has added no new material to the application by these amendments. The application is now in condition for allowance and expeditious notice thereof is earnestly solicited. Should the Examiner have any questions or comments which would place the application in better condition for allowance, he is respectfully requested to call the undersigned attorney.

Respectfully submitted,

Vijayalakshmi D. Duraiswamy

VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE CLAIMS:

Please cancel claim 17.

18. (Amended) A satellite ready building as recited in claim [17]

21 wherein said connector comprises a universal connector.

21. (Amended) A satellite ready building [as recited in claim 17

further] comprising:

a plurality of studs;

satellite wires positioned adjacent to said studs having a first termination and a second termination, said first termination positioned outside the building;

a connector coupled to said second termination of said satellite wire;

a drywall layer coupled to said studs to substantially enclose the satellite wires therein; and

a radome enclosing said first termination.
